Portfolio: devos-portfolio-indol.vercel.app

PROFESSIONAL SUMMARY

MCA student passionate about full-stack development, backend systems, and cybersecurity. Experienced in building real-world projects using Python, Flask, PHP, MySQL, and JavaScript. Strong interest in secure backend architecture, system design, and practical software engineering. Active participant in hackathons, technical workshops, and cybersecurity learning programs.

EDUCATION

Saurashtra University, Rajkot

Master of Computer Applications (MCA)

2025 – 2027

Grade: A

T.N. Rao Institute of Management Research & Technology, Rajkot

Bachelor of Computer Applications (BCA)

2022 – 2025

First Class with Distinction

TECHNICAL SKILLS

Programming Languages:

Python, PHP, JavaScript, C, SQL

Web Development:

Flask, HTML5, CSS3, Bootstrap, AJAX, jQuery

Database:

MySQL, SQLite, PostgreSQL, SQLAlchemy

Tools & Technologies:

Git, GitHub, XAMPP, VS Code, Telegram Bot API

Cybersecurity & Concepts:

Authentication Systems, RBAC, Network Fundamentals, DFIR Basics, PowerShell Forensics, Secure Backend Practices

PROJECTS

PlateNotify | Flask, Python, PostgreSQL, Telegram Bot API

- Developed a privacy-focused anonymous vehicle notification platform.
- Implemented secure authentication, rate limiting, and CSP security headers.
- Built real-time Telegram alert integration using Telegram Bot API.
- Used Flask, SQLAlchemy, SQLite/PostgreSQL, Flask-Login, and Flask-Talisman.

NodeNet | PHP, MySQL, JavaScript

- Built an offline-first decentralized lab file management simulator.
- Implemented file/folder operations, authentication, sharing system, and browser-based text editor.
- Designed desktop-style UI using Vanilla JavaScript.
- Developed modular backend APIs using PHP and MySQL.

Service Center Management System (SCMS) | PHP, MySQL

- Developed a web-based complaint and technician management system.
- Implemented complaint tracking, technician assignment, and role dashboards.
- Built responsive UI using Bootstrap and JavaScript.

FleetFlow | Hackathon Project

- Developed a modular logistics and fleet management platform during hackathon.
 - Implemented validation logic, workflow automation, and analytics dashboard.
 - Worked on backend logic and database design.
-

CERTIFICATIONS

- Harvard CS50x – Introduction to Computer Science
 - Google AI Essentials
 - Google Prompting Essentials
 - SQL (Basic) – HackerRank
 - Cisco HTML Essentials
 - Deloitte Cyber Job Simulation
 - AWS Solutions Architecture Job Simulation
 - Tata Cybersecurity Analyst Job Simulation
-

EXTRACURRICULAR ACTIVITIES

- Participated in hackathons including Odoo x Gujarat Vidyapith Hackathon and AutonomousHacks.
 - Attended cybersecurity and digital forensics lectures under ISEA and NFSU initiatives.
 - Active learner in software engineering, cybersecurity, and AI-assisted development.
-

LANGUAGES

- English
- Hindi
- Gujarati
