
Borisagar Siddharth B.

Computer Engineer

Rajkot, Gujarat, India
+91-84605-89338
info.sidd19@gmail.com

MCA student skilled in Python, C++, SQL, Full-Stack Development, and basic AI application development. Passionate about coding, problem-solving, and building efficient software solutions through practical projects. Looking for an opportunity to grow and contribute in a Computer Engineering role.

SKILLS

- Language: C, CPP, Python, PHP, SQL
- Other: Figma, Linux, Git, Google Workspace, Computer Networking, Cloud(GCP)

EDUCATION

Department of Computer Science, Saurashtra University, Rajkot

- *Master of Computer Applications*

2025 - 2027(2Y)

T. N. Rao College, Rajkot

- *Bachelor of Computer Applications (79%)*

2022 - 2025(3Y)

HACKATHON

AutonomousHacks'26 (Gujarat's first autonomous-focused hackathon)

- Google powered AI based Hackathon organised at Silver Oak University BY GDG Gandhinagar.

- Top 50 / 250+ Teams And 1650+ Participants

Jan-26

CERTIFICATE(s)

Google - Google AI Essentials Specialization

Credential ID GUZ1EML034L2

May-26

Google - Google Prompting Essentials

Credential ID 1CV43DICINLP

May-26

ACADEMIC PROJECT(s)

SCMS: Service Center Management System

- Core PHP(MVC), JS, AJAX, jQuery, MySql

- Engineered a secure complaint routing and dealer-to-technician dispatch module in PHP.
- Designed customized administrative and dealer dashboards for clear diagnostic and volume insights.
- Integrated dynamic status tracking using jQuery AJAX requests to achieve zero-refresh state updates.
- Optimized local database schema with index keys to keep lookup queries under 10ms.

NodeNet Offline Network Manager

- PHP, MySQL, JavaScript, PDO, XAMPP

- Authored an interactive IDE-like code editor supporting live browser previewing and drag-and-drop folder uploads.
- Constructed a folder-to-ZIP compression downloader allowing bulk transfers inside standard HTTP sessions.
- Formulated a live network dashboard tracking active node count and hosting live public explorer folders.
- Implemented session-based user authentication and PDO prepared statements ensuring secure database containment.
